No. of teachers participated - 02

No. of students participated – 13

Impact of the activity – The villagers are enlightened to keep their surroundings clean.

Academic Year 2019-20

TREE PLANTATION PROGRAM

REPORT

Trees represent life, growth, peace and nature. They produce oxygen, clean soil, prevent drought, control flood related disasters, prevent soil erosion, improve physiological, mental and spiritual health, and also reduce carbon footprints. Keeping this in mind the campaign for tree plantation was initiated by Eco Club of Government College, Gharghoda in the college- adjoining area on 2nd October 2019. The senior students of our college selected an area to plant the saplings in a well-organized manner in the campus of the college to raise awareness and consciousness about environment among the masses. The forest department co-operated with us by supplying the saplings in a large number. To maintain the ecological balance, this programme was organised with a lot of sincerity, seriousness and love. Students from all classes participated in this programme. Students planted saplings, and watered them. This program created a great enthusiasm among all the students and also among guardians and the general public. At the very end of the programme, the students took an oath that they must take much care of the saplings and should not cut trees ruthlessly. The program was a huge success, empowering students with substantial knowledge of environment and plants.

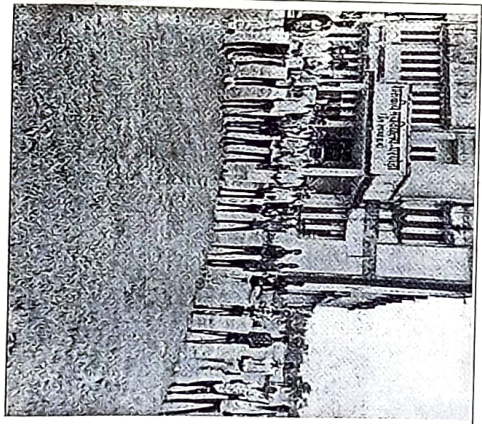

We hope that such activities shall sensitize and encourage the students to "Love the trees until their leaves fall Off, then encourage them to try again next year".
